

# 21 Household Expenditure & Income

## T *Introduction*

The household expenditure and income (household budget) was first studied in the year 1314 by the National Bank of Iran. The main objective of the study was to obtain the consumption coefficients for calculation of living expenditure index.

After a long cease, in the year 1338, Economic Studies Office of the National Bank of Iran collected statistics in this field by interviewing sample households in 23 cities of the country to revise the weight of the living expenditure index. Since the year 1347, survey of households expenditure in urban areas, on a larger scale, was initiated by the Statistical Centre of Iran (SCI). Since the year 1353, the survey has covered both expenditure and income of urban households and continued to date, excluding the years 1355, 1357 and 1360. The results have been processed and published annually.

Survey of rural households expenditure was first conducted by the former General Department of Public Statistics in the year 1342, and by the

establishment of the SCI in the year 1344, the survey continued in a larger scale by the new organization. Since the year 1353, this survey in addition to expenditure has covered the income of rural households and continued to date excluding the years 1359 and 1360 the results of which have been processed and released annually.

Currently, statistics on urban households expenditure and income are released by both the Central Bank and the SCI; however, those on rural households are released by the SCI.

In this chapter, the statistics on average annual food and non-food expenditures of an urban or a rural household have been presented by deciles of expenditure, number of household members and average annual income of the mentioned households by income sources based on the results of the SCI's (sample) surveys. These survey were taken according to the United

Nations recommendations (NHSCP<sup>1</sup> and SNA<sup>2</sup>). The sample survey is conducted through visiting sample households in urban and rural areas.

#### ***Definitions and concepts***

**Expenditure:** monetary value of goods procured or services provided by the household via purchase, domestic production, against service and free receipts from different organizations, for own consumption or as gift to others.

**Gross expenditure:** household expenditure without reducing the income from sale of used goods.

**Net expenditure:** gross expenditure less the income from sale of used goods. Where the value of the sold goods is more than the purchased goods, the result is published as a negative figure.

**Household, urban and rural areas:** see Chapter 3, Definitions and concepts.

**Decile:** expenditure of consuming population sorted on the basis of the goods and services charges and then dividing the society into ten equal groups. Each group is called a decile.

**Income:** all the sums and value of goods received by the household for the job done or capital invested or from other sources (retirement pension, occasional income, etc.) during the enumeration. In this survey, various net incomes are as follows:

***Net wage and salary income of public, cooperative and private sectors:*** income of all the wage and salary earners of the household working in public, cooperative and private sectors after deduction of the tax and retirement allowance..

***Agricultural self-employment income:*** the income of the members of the household as employer or own account worker in agricultural sector after deduction of job on costs. The job on costs covers paid wage and salary, primary material charges, non-durable appliances, amortization, other production charges and job taxes.

***Non-agricultural self-employment income:*** income of the members of the household as employer or own account worker in non-agricultural self-employment sector, after deduction of job on costs.

***Miscellaneous income:*** all sums and goods value the household has received through ways other than its members employment, such as selling of the home-made manufactures, retirement pension, rental of movable and immovable assets, dividend, and charity and social security organization aids.

#### ***Selected information***

In the year 1393, the average annual net expenditure of an urban household amounted to 234.9 million rials including 176.7 million rials for non-food expenditures (75.3 percent) and 58.1 million rials (24.7 percent) for food and

<sup>1</sup> National Household Survey Capability Programme, New York.

<sup>2</sup> System of National Accounts, 1993

tobacco which increased by 14 percent in comparison to the previous year.

In the year 1393, out of 176.7 million rials for average annual urban household net non-food expenditure the highest and lowest share was respectively related to housing expenditures with 78.5 million rials (44.4 percent) and recreation, entertainment and cultural services with 7 million rials (3.9 percent) respectively.

Furthermore, in the same year, out of 58.1 million rials for annual urban household net food and tobacco expenditure, the highest and lowest share was respectively related to meat with 12.5 million rials (21.6 percent) and spices, seasonings and pickles with 1.9 million rials (3.3 percent).

In the year 1393, average annual rural household net expenditure amounted to 138.5 million rials including 81.5 million rials for non-food expenditures (58.8 percent) and 57 million rials (41.2 percent) for food and tobacco which increased by 6.9 percent in comparison to the previous year.

In the year 1393, out of 81.5 million rials for average net non-food expenditure of a rural household, housing expenditure with 23.6 million rials (29 percent) and recreation, entertainment and cultural services with 2.7 million rials (3.3 percent) accounted for the highest and lowest proportion of expenditure, respectively.

Moreover, out of 57 million rials average net food and tobacco expenditure of a rural household, flour of cereals; macaroni and similar products with 14.3 million rials (25.1 percent)

and spices, seasonings and pickles with 1.9 million rials (3.3 percent) had the highest and the lowest shares among the expenditure items, respectively.

In the year 1393, the average annual income of an urban household was about 241.3 million rials. Out of the income sources, miscellaneous incomes with 124.1 million rials (51.4 percent) were of the highest share.

Also in the year 1393, the average annual income of a rural household amounted to 139.1 million rials. Out of the income sources, miscellaneous incomes with 55.2 million rials (39.7 percent) was of the highest share.
