#### Weights and Measures

billion	1000 million (1 milliard)
1 kilometre [km]	1000 m
1 ha	10000 m <sup>2</sup>
1 sq km [km <sup>2</sup> ]	1000000 m <sup>2</sup> – 100 ha
1 litre [lit]	0.001 m <sup>3</sup>
1 barrel (US)	$0.16 \text{ m}^3 - 158.98 \text{ lit}$
$m^3$	6.29 barrels (US)
ton	1000 kg
megawatt hour	1000 kWh

Where figures are rounded, discrepancies may occur between sums of the components and the total. All ratios and indexes were calculated before rounding.

#### Iranian calendar vs Gregorian calendar

Iranian year	1375	1380	1385	1390	1391	1392	1393	1394
Christian year	1996-	2001-	2006-	2010-	2011-	2012-	2013-	2014-
	1997	2002	2007	2011	2012	2013	2014	2015

Iranian months	Christian months
Farvardin	21 March-20 April
Ordibehesht	21 April-21 May
Khordad	22 May-21 June
Tir	22 June-22 July
Mordad	23 July-22 August
Shahrivar	23 August-22 September
Mehr	23 September-22 October
Aban	23 October-21 November
Azar	22 November-21 December
Dey	22 December-20 January
Bahman	21 January-19 February
Esfand	20 February-20 March

Iranian year begins on March 21st of the Christian year and ends on March 20th of the next year. To convert the Iranian year into Christian year, add 621 to the former.

### IN THE NAME OF ALLAH THE COMPASSIONATE, THE MERCIFUL

#### **Preface**

The Statistical Yearbook of Iran contains the latest statistical information available on economic, social and cultural areas of the country to meet the statistical data needs of the local decision makers, planners and researchers, as well as all other interested users. The Yearbook was first officially compiled in the year 1345 and has been released regularly.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the Statistical Centre of Iran (SCI), (b) the results of surveys conducted by other government organizations, and (c) administrative registers. Since population censuses are taken every 10 years and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not available annually and continuously.

In order to make timely provision of important statistical information to meet the needs of users and reduces their references to various organizations producing statistics, the SCI has attempted to have timely release of different statistical publications including the Statistical Yearbook, and also developed the Statistical Information Database.

The SCI Publication Database, as part of the SCI Statistical Information Database, which contains 4780 titles, is accessible on our website, <a href="www.amar.org.ir">www.amar.org.ir</a> as of the year 1381. The Database is continuously updated and enjoys the capability of advanced search which provides swift and easy access to the existing information. At present, the Statistical Yearbook is accessible at <a href="www.amar.org.ir">www.amar.org.ir</a>

The 1394 Statistical Yearbook of Iran is published in both Persian and English. The related CD-ROM version is also available. In addition, the Persian version of the statistical yearbooks of 31 Ostans (provinces) are released by the Plan and Budget Organization of the provinces nationwide with similar format under supervision of the SCI.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items. Further, they provide readers with justifications for unavailability of some timely data or exclusion of some statistical items.

It is noteworthy that the beginning of the yearbook includes selected information of all chapters which has been added to the introduction of the related chapter, too. In order to have a general view on all information presented in the Yearbook, its reading is recommended.

Particular thanks and appreciation are extended to all the *Director-Generals of Statistics and Information Offices* of the ministries, organizations and the Islamic Revolution institutions, as well as all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously for enhancing the yearbook quantitatively and qualitatively.

Special thanks go to my colleagues in the Statistical Centre of Iran who contributed to the preparation and production of this publication.

Omid Ali Parsa Head, Statistical Centre of Iran

#### **Selected information**

ran comprises a land area of over 1.6 million square kilometers. It lies on the southern half of the northern temperate zone, between latitudes 25° 4' and 39° 46' north, and longitudes 44° 2' and 63° 19' east. The land's average height is over 1200 meters. The lowest place, located in Chaleh-ye-Loot is only 56 meters high, while the highest point, Damavand peak in Alborz Mountains, rises as high as 5610 meters. The land height at the southern coastal strip of the Caspian Sea is 28 meters lower than the open seas.

Iran is bounded by Turkmenistan, Caspian Sea, Azerbaijan, and Armenia on the north, Afghanistan and Pakistan on the east, Oman Sea and Persian Gulf on the south, and Iraq and Turkey on the west.

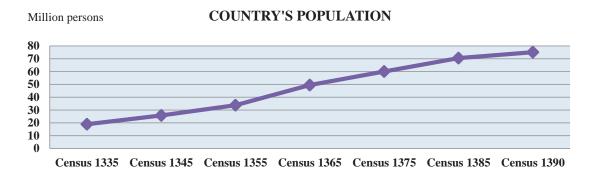

In the year 1394, I.R. Iran was divided into 31 Ostans (provinces), 430 Shahrestans (subprovinces), 1059 Bakhshes (counties), 1243 Shahrs (cities) and 2590 Dehestans (rural agglomerations).

On the basis of the Population and Housing Census taken in the month of Aban, 1390, the total population of the country was 75149669 persons (comprising 50.4% male & 49.6% female);

compared to the result of the Census in the year 1385, the average annual population growth was 1.3%.

In the 1390 Census, there were 21.2 million households out of whom about 72.82% were settled in urban areas and the rest (27.12%) was settled in the rural areas. In the mentioned year, the mean age for men and women was 29.8.

In the year 1394, about 1.5 million births were registered out of which 48.6 percent were female. Moreover, about 685,000 marriages and about 164 thousand divorces were recorded over the year 1394, showing a decrease of about 5.3% and an increase of below 0.1%, respectively in comparison with the preceding year.

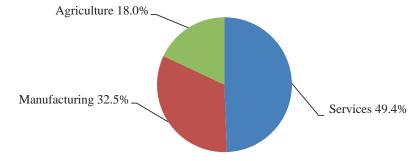

In the year 1394, based on the Labor Force Survey, about 38.2% of population aged 10 and over were considered economically active, with an unemployment rate of 11%. Unemployment rates

for male, female, in urban and rural areas were 9.3, 19.4, 12.2, and 8.1 percent, respectively.

Amongst Ostans of the country, Kohgiluyeh & Boyerahmad, Kermanshah and Chaharmahal & Bakhtiyari with 17.7, 17.6 and 16.4 percent had the highest unemployment rate and East Azerbayejan Kerman, and Markazi with 7.3, 7.9 and 7.9 percent had the lowest unemployment rate of the country, respectively.

# RELATIVE DISTRIBUTION OF EMPLOYED POPULATION AGED 10 AND OVER BY THREE MAJOR ECONOMIC ACTIVITIES, THE YEAR 1394

In the year 1394, the area zones protected by the Iran Department of Environment was about 17108335 hectares of which the Ostans of Kerman with 2405943 hectares and Qazvin with 25344 hectares had the highest and lowest areas, respectively.

In the same year, the number of conflagration in forests and ranges was 2088 which rose about 3.6 percent in comparison with the previous year.

In the year 1394, the average volume of collected wastewater was 4242400 cu m which shows a 10.2 percent rise compared to the previous year. The Ostans of Khuzestan and Tehran had the highest share of collected wastewater with 18.1 percent and 15.5 percent, respectively and the Ostans of Semnan and Lorestan with 0.24 percent and 0.25 percent had the lowest, respectively.

In the year 1394, among the pollutant and greenhouse gases resulted from the burning of fuels by the transportation sector, the CO2 with 150173422 tons (93.1 percent) had the highest share. It is noteworthy that most of the CO2 was resulted from the burning of gas oil and the lowest one goes to the burning of liquefied gas.

In the year 1394, about 44 percent of the population of the country were under the coverage of the network for collection and transmission services of urban sewage which rose about 4.7 percent compared to the previous year. The highest and lowest shares of the population under the coverage of this network belong to the Ostans of Kordestan and Kerman with 92 and 10 percent, respectively.

In the year 1394, 84 percent of hospitals enjoyed an appropriate solid waste management system moreover; 74.3 percent of hospitals had an appropriate sewage management system showing a 5 percent increase and a 1 percent decrease in comparison with the previous year, respectively.

During the academic year 1394-1395, over 7 million and 422 thousand persons were studying in primary schools, over 3 million and 71 thousand persons were in lower secondary schools and over 2 million and 607 thousand persons were in upper secondary schools. Compared to the previous year, the primary course increased by 3.2 and lower secondary courses increased 48.5 percent and upper secondary courses declined by 64.8 percent, respectively.

Total number of university students over the academic year 1394-1395 was more than 4 million and 348 thousand persons, indicating a decrease of 9.4% compared to the previous year. Share of the Islamic Azad University students out of the total number of university students was about 37.3 percent. Out of the total number of the students, 18.9% were studying for associate's degree, 58.8% for bachelor's degree, 17.8% for master's degree and 4.4% for professional doctorate and PhD.

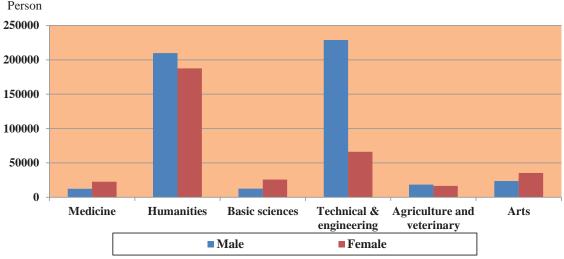

Total number of university graduates during the academic year 1393-1394 was about 859,000 persons, showing more than 16.4 percent increase compared to the previous year.

#### **UNEMPLOYMENT RATE, THE YEAR 1394**

In the year 1394, over 42,000 physicians were employed in the Ministry of Health and Medical Education. Out of the cited number, 15340, 3700, and 285, 1896, 15679, 2159 and 3334 persons were general practitioners, dentists, lab sciences PhD, pharmacists, specialists, and sub-specialists, and Professional PhD, respectively. Also in the same year close to 239,000 paramedics were working in the nation's medicine universities out of whom 73795 people were professional nurses (holding bachelor's or higher degree), 414 persons were practical nurses( holding associate's degree),6168 persons were operating room technicians, 5268 persons were anesthetist associate or technicians, 10713 people were health workers, 30131 people were health attendants, 21068 persons were midwives, and 91312 persons were other paramedics.

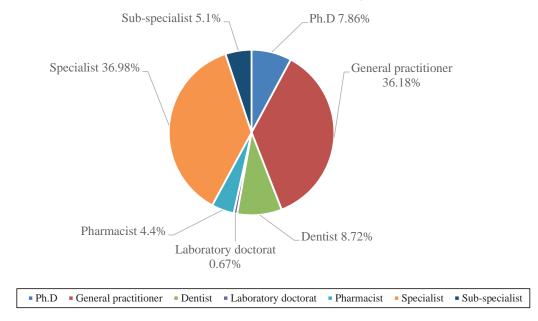

In the year 1394, there were 899 operating hospitals with 148,035 fixed beds out of which 723 hospitals (80.42%) were affiliated to the government sector and 176 (19.58%) hospitals were for private sector.

In the year 1394, there were a number of 4672 health care and medical centres, 2915 health stations, 257 maternity facilities, 17852 operating health houses, 5639 medical diagnosis laboratories, 7001 rehabilitation centres and 3070 nuclear medical diagnostic institutes in the country.

In the year 1394, a number of 10185 pharmacies in the country out of which 10 percent was for the government and close to 90 percent belonged to private sector. Out of the total pharmacies, 13 percent are 24-hour pharmacies. In this year, there were 2302 Emergency Medical Services (EMS) out of which 892 stations(39%) were in urban areas and 1410 stations(61%) in rural areas. In the year 1394, a number of 2538747 persons visited blood transfusion centres to donate blood which totally, a number of 2083914 blood bags were donated. 95.6 percent of the donors were male and 4.4 percent were females. In the year 1394, there were a number of 1756 veterinary pharmacies, 1072 vaccination centres for livestock and 862 veterinary clinics, 54 livestock hospitals and 274 veterinary laboratories in the country.

In the year 1394, there were a number of 378 livestock slaughterhouses and 243 poultry slaughterhouses in the country.

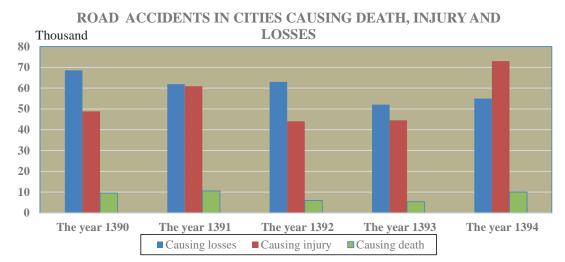

# DISTRIBUTION OF PHYSICIANS EMPLOYED IN THE MINISTRY OF HEALTH AND MEDICAL EDUCATION BY TYPE OF SPECIALITY, THE YEAR 1394

In the year 1392, about 3 million and 832 thousand cases in general courts and about 650 thousand cases in appeal courts were settled nationwide.

In the year 1394, over 765 thousand robberies were registered by the Police Department of the I.R of Iran which decreased by 4.4 percent in comparison to the preceding year.

In the year 1394, the number of the inter-city car accidents with a 35.6% increase in contrast to the previous year reached about 138000 cases, out of which 7% of accidents resulted in death, 53% in injury and 40% in losses. Also in the same year, the number of the intra-city car accidents with a 93.3% increase in comparison with the previous year reached about 314,000 cases, out of which 1.3% resulted in death, 60.4% in injury, and 38.3% in losses.

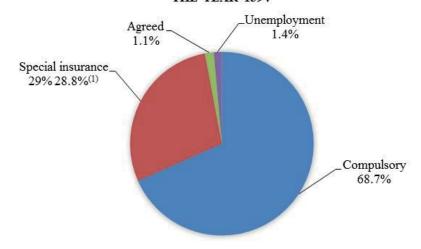

According to the results of the 1390 Population and Housing Census, about one million and 18 thousand persons have at least one type of disability, of whom 62.6% accounted for male. It should be mentioned that about 81 percent of the disabled persons have one type of disability only.

At the end of the year 1394, the number of establishments covered by the Social Security Organization was about one million and 214 thousand, and the number of principal insured persons covered by the mentioned Organization increased to over 13 million and 711 thousand persons, showing a rise of 2.8% compared to the previous year.

In the year 1394, beneficiaries (principals and dependents) of medical services covered by Iran Health Insurance Organization were about 38.5 million persons, of whom 15.1%, 23.7%, 0.3%, 56.7% and 4.2% enjoyed government employees insurance, universal health insurance, Iranian insurance, villagers insurance and the insurance of other groups, respectively.

# THE PRINCIPAL INSURED PERSONS COVERED BY THE SOCIAL SECURITY ORGANIZATION BY TYPE OF INSURANCE AT THE END OF THE YEAR 1394

1. Including insured persons in own account occupations, weavers, drivers, voluntary, construction workers and others.

In the year 1394, the highest and lowest programs produced by national and international radio channels of the I.R.I B were on culture, art and Islamic knowledge with over 78,000 hours and on industry with 1600 hours, respectively. Also in the same year, the highest and lowest programs produced by TV channels of the I.R.I.B were on the above mentioned subjects with 60,000 hours and 1700 hours, respectively.

In the year 1394, over 13 million persons were feature film audiences in 380 cinema auditoriums which increased by 3.6 percent compared to the preceding year.

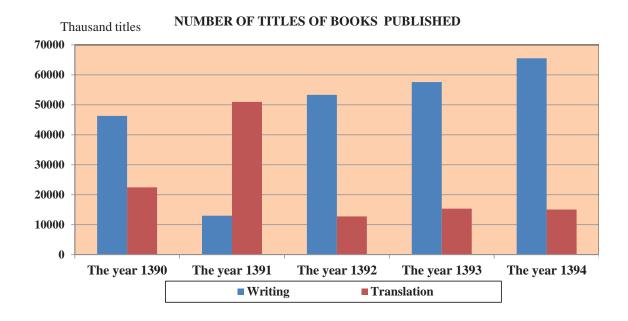

During the same period, the number of titles of the press and periodicals published in Tehran and other cities of the country was 4248 and 4039 which grew by 37.8% and 42.7%, respectively in comparison with the preceding year. Moreover, 296 titles of the said press and periodicals were published daily while 1108 titles were published weekly.

In the year 1394, there were 3278 public libraries affiliated to the Ministry of Culture and Islamic Guidance which increased 2.4 percent compared to the year 1393.

Also, Shiraz Hafesiye mausoleum with 13.63 percent of the total visitors to the historical monuments was the most visited place. Furthermore, in the year 1394, the number of foreign tourists arrived in the country was more than 5 million and 181 thousand persons indicating an increase of 2.7 percent in comparison with the year 1393.

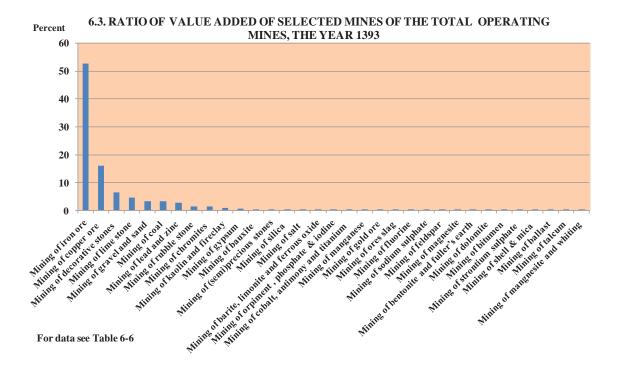

In the year 1394, the number of major Hajj (Mecca) pilgrims was over 59000 persons; in this year over 360000 and 590000 persons went on a pilgrimage to Umrah (minor Hajj) and holy places, respectively.

In the year 1393, there were 5355 operating mines in the country with a total of 91869 workers which decreased by 2.9 percent compared to the year 1392.

In the same year, the value of the mines' production amounted to 139206 billion rials. Amongst different activities, iron ore, copper ore, and decorative stones, with 76987563, 23123954, and 8263572 million rials had the highest annual production values, respectively.

In the year 1393, the value added of the activities of the operating mines amounted to 97590386 million rials out of which the highest amount was for iron ore, copper ore, and decorative stone, with 52697479, 16013670 and 6405388 million rials, respectively. The total value added obtained from these mines comprises about 77% of the total value added of this sector.

In the year 1394, a total of 523392 thousand barrels of crude oil were exported, which shows a 6.8% increase compared to the preceding year. Also in the same year, the amount of oil products exports was 28 million liters per day with an increase of 47.4% compared to the preceding year.

Furthermore, in the same year, the production of some oil products in the total national refineries by cubic meter per day was: liquefied gas: 10135, motor spirit 67872, burning oil: 20061, and oil gas: 87606 which changed -7, 4.6, -7.3 and 4.5 percent compared to the preceding year.

In the year 1394, oil gas with the annual consumption of 31794 thousand cubic meters had the maximum share of consumption among all kinds of oil products and motor spirit with the annual consumption of 26856 thousand cubic meters was at the second rank.

Over the year 1394, 1063 cities were supplied with piped gas and 50 cities were being supplied with piped gas. The total production of the National Company of the Petrochemical Industries with a 4.3% increase compared to the preceding year reached 46408 thousand tons in the year 1394.

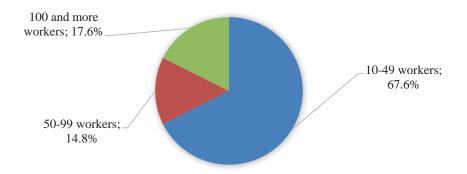

In the year 1394, there were 14452 manufacturing establishments with 10 and more workers with 1309059 employees, which declined by 1.7 and increased 2.3 percent, respectively compared to the preceding year. About 97.5 percent of the mentioned establishments are owned by private sectors and about 2.5 percent by public sector. Besides, from among the said number of workers, about 16.9 percent were employed in the establishments with 10-49 workers, 11.3 percent in the establishments with 50-99 workers and 71.8 percent were employees of the establishments with 100 and more workers.

In the same year, the value-added of the activity of manufacturing establishments with 10 and more workers has been over 1332.4 thousand billion rials which increased by 11 increase compared to the preceding year.

In the year 1393, Bushehr, Khuzestan and Hormozgan provinces with 1552419, 457736 and 244836 million rials, respectively had the highest productivity for manufacturing establishments with 10 and more workers and Bushehr, Hormozgan and Khuzestan with 7478, 2460 and 2185 million rials had the highest productivity for the workers of manufacturing establishments with 10 and more workers.

### DISTRIBUTION OF NATIONAL MANUFACTURING ESTABLISHMENTS WITH 10 AND MORE WORKERS BY SIZE, THE YEAR 1393

In aquatic year 1393-1394, the amount of annual discharge of the underground water resources was about 61094 million cubic meters which decreased 0.50 % in comparison with the aquatic year 1392-93.

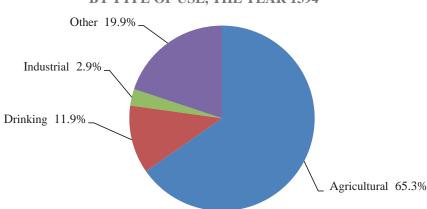

In the year 1394, the inflow of the large reservoir dams was 36155 million cubic meters which decreased 28.1% in comparison with the previous year. In this year, 25585 million cubic meters of large reservoir dams water was consumed, 65.28 percent of which belonged to the agricultural consumptions.

In the year 1394, there were more than 20712000 water extensions (urban and rural), which had a 3.0 percent increase in comparison with the preceding year. Out of this number, about 15431000 extensions were for urban areas which had a 3.1% increase compared to the previous year.

In the year 1394, the gross electricity generation of institutions affiliated to the Ministry of Energy was about 280689 million kilowatt-hours, about 22.0 percent of which was produced in the steam power plants. Furthermore, the gross electricity generation of the installed generators had a 2.26 percent increase compared to the preceding year.

In the year 1394, percentage of electricity subscribers in house, public, agricultural and manufacturing sectors was 81.08 %, 4.46%, 1.15%, and 0.65 %, respectively. Also in this year, the percentage of the electricity sold and consumed in house, manufacturing and agricultural sectors and for the streets lightning was 33.47%, 32.0%, 16.0%, 9.7%, and 1.7%, respectively.

At the end of 1394, a number of 56170 villages (about 4.3 million rural households) were electrified which increased by 0.9% in comparison with the previous year.

### WATER CONSUMPTION OF LARGE RESERVOIR DAMS BY TYPE OF USE, THE YEAR 1394

In the year 1394, over 120 thousand construction permits with 62358 thousand square meters floor area were issued by municipalities which decreased 0.42% and 8.47%, respectively in comparison with the preceding year. It is noteworthy that over 83 percent of the permits issued were related to the housing units.

In the year 1394, the value of investments made in urban areas by private sector for the newly started, semi-finished and completed buildings was about 701440 billion rials which decreased by 15.56 percent in comparison with the year 1393.

In the year 1394, the cities of Tehran, Esfahan and Arak with 42914, 16750 and 15160 thousand rials had the highest average price and Yasuj, Ilam and Yazd with 3264, 5628 and 5968 thousand rials had the lowest average price per square meter of the housing unit's floor area transacted in the real estate agencies. Besides, in the same year, the cities of Tehran, Karaj and Qazvin with 211226, 90157and 76280 rials had the highest average rental price, respectively and Ilam, Yazd, and Yasuj with 25322, 25626 and 28302 rials had the lowest average rental price per square meter of the housing unit's floor area transacted in the real estate agencies between the landlord and leaseholder.

In the year 1394, the length of railway lines (main tracks, side tracks and industrial-commercial tracks), was 13348 kilometers which increased by about 1 percent in comparison with the preceding year. In the same year, the length of the urban roads of the country was 86166 kilometers and the length of the rural roads was 128395 kilometers.

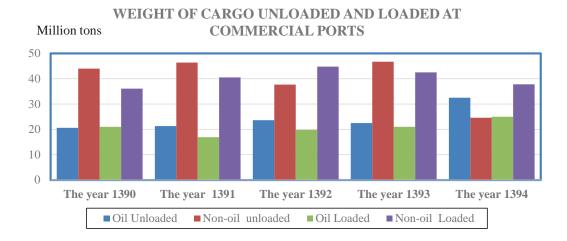

Over the same period, the number of passengers transported via railways was 24,453,000 persons; the number of passengers transported via public road passenger vehicles (bus, minibus, passenger vehicles) was over 178 million persons; and about 23.6 million passengers were transported via the airports.

In the year 1394, the total number of installed telephone lines was 34688475 out of which 30262157 telephone lines were in use. The number of telephone lines installed and in-use both increased 2.9%. In the year 1394, the total lines ceded to mobile phone operators including Mobile Telecommunication Company of Iran, commonly abbreviated as MCI and also known under its brand name Hamrahe Aval, MTN Irancell and RighTel was 149775315 lines out of which 18915959 lines were postpaid (iSIM), and 130859356 lines were prepaid. The total number of lines in use in this year was 75914506 out of which 14981304 lines were postpaid (iSIM), and 60933202 lines were prepaid.

The total number of lines in use at the end of year 1394 was 75914506 which increased 7% in contrast to the preceding year. Out of this number, the Ostans of Tehran, Esfahan, Khorasan-e-Razavi, Fars and Khuzestan with 116551439, 5141320, 5028730, 4594920 and 4574351 had the largest mobile phone subscribers compared to other Ostans

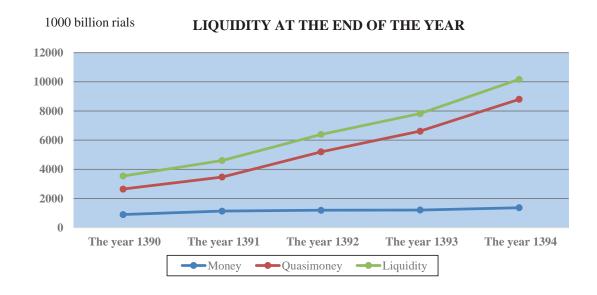

In the year 1393, 77.9% of population aged 6 and over used mobile phone covered by operators MCI known as Hamrahe Aval, The total number of high-speed Internet lines in the total country was 8825105 out of which 6141107 lines were for house and 2683998 lines were for commercial uses

In the year 1393, the cable capacity of intercity dark fiber was 57044 kilometers. The bandwidth of international Internet and IP network capacity was 547.0 and 4000 Gigabit per second, respectively.

In the year 1394, the value of foreign trade transactions was over 2387 thousand billion rials, which increased about 0.2 percent in comparison with the preceding year. Out of the stated value, 51.2 and 48.8 percent were related to the imports and non-oil exports, respectively.

During the year 1394, about 35.2 million tons of different goods with a value of 1222.7 thousand billion rials entered into the country via customs terminals which decreased by 13.5 percent in comparison with the preceding year. It should be noted that the highest rial value of imports relates to China (25.3 percent of total value), the UAE (18.5 percent of total value), and Republic of Korea (8.9 percent of total value). Moreover, in this year, 93.5 million tons of various kinds of non-oil goods with a value of 1164.8 thousand billion rials were exported abroad via customs terminals which rose 20.2 percent in value compared to the preceding year. The highest value of these exports relates to the countries of China (19.4 percent of total value), Iraq (18.3 percent of total value), and UAE (15.5 percent of total value).

In the year 1394, liquidity (money and quasi money) of banking system was about 10172.8 thousand billion rials which increased by 30.0% compared to the previous year.

Over the same year, outstanding claims of the banking system on the public sector were about 1738.6 thousand billion rials showing a rise of 18.6 percent in comparison with the previous year.

Outstanding claims of banks and non-bank credit institutions on non-public sector in the year 1394 were about 7362.2 thousand billion rials which increased by 16.7%, compared to the previous year.

Non-public sector outstanding deposits with the banking system in the year 1394 were about 9800.9 thousand billion rials which rose by 31.2%, compared to the previous year.

In the year 1394, the highest amounts of premiums received in the insurance market of the country for three fields were as follows: third party (70.7 thousand billion rials), treatment (51.5 thousand billion rials) and car body insurance (13.9 thousand billion rials) showing 7.2, 48.0 and 10.2 percent increase, respectively compared to the previous year.

In the year 1394, value of the shares transacted for the eligible companies on Tehran Stock Exchange was about 426 thousand billion rials showing a decrease of 21.3% in comparison with the previous year.

National budget resources for the year 1395 were predicted to be about 9785.5 thousand billion rials, indicating a rise of 15.6 percent in comparison with the previous year.

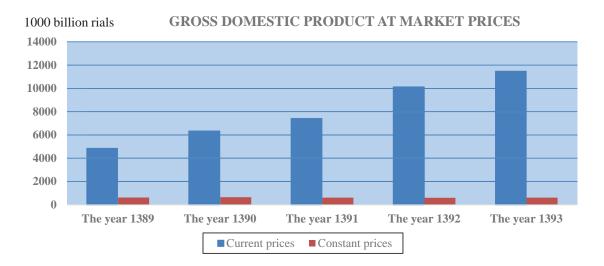

Government revenues and cession of government capital and financial assets were predicted about 3354.9 thousand billion rials in the year 1395, indicating a rise of 29.95 percent in comparison with the previous year.
