FOREWORD

The first Statistical Yearbook of Iran, covering the years up to 1966, was published by the Statistical Centre of Iran in 1967. It has been published in Farsi every year since then, and in English once every two years. Beginning with this edition, the S.C.I. plans to publish the yearbook in both languages on an annual basis.

The present edition, which is the fifth in English, gives statistical information up to March 20, 1974. The only difference between the Farsi and English versions of this edition is that in the English version some of the tables are presented in abridged form and others, which were considered of little importance to users of the international community, have been omitted.

The tables included in the yearbook give detailed information on the economic and social developments of Iran. This information has been collected from government agencies or through censuses and sample surveys conducted by the S.C.I. The sources are duly given in the footnotes. Users who need more detailed information on certain aspects of the economic and social life of Iran are requested to contact either the S.C.I. or the government agencies in charge of the relevant data collection.

The S.C.I. is fully cognizant of the need for more relevant, reliable, and timely statistics and is making continuing efforts to improve the relevance, reliability, and timeliness of the data and the quality of their presentation and publication. It is the policy of the S.C.I. to make further improvements in these aspects each year, until the requirements of the users are fully met. For this reason, both qualitative and quantitative changes have been introduced in the present volume.

The S.C.I. welcomes comments and constructive criticism on its publications in order to improve them further and to satisfy better their international users.

Finally, the S.C.I. wishes to extend its sincere thanks to all of the S.C.I. statistical and technical staff and to the various government agencies, without whose collaboration this yearbook could not have been published.

Statistical Center of Iran

SYMBOLS

- 0 Equal to zero
- Statistics not available (no surveys or censuses taken)
- ... Figures not available (i.e. not yet published)
- x Attributes not essentially or actually existing
- + Figure less than half of the unit
- // Negligible
- * Estimated figures
- ** Not final (to be used with caution)
- () Figures are included in sub-totals

Discrepancies in totals are due to rounding of figures

Calculation of ratios and indexes were made before rounding

* There are 31 days in each of the first six months of the Iranian Calendar, 30 days in each of the next 5 months and 29 days in the last month, except in leap years when it has 30 days.

To convert the Solar year into Christian year please note the following:

Solar year + 621 = Christian year.

The Solar year, as shown in the above table, begins from March 21 of the current year and ends on the 20th of March of the coming year.

The conversion of the months follows the same pattern as shown in the above table.

CHAPTER I
GEOGRAPHICAL CHARACTERISTICS
AND
ADMINISTRATIVE DIVISIONS

Iran is a part of the Iranian plateau of southwest Asia, which is encircled on the west, north and southeast by the wide plains of Mesopotamia, Kura, Transoxania, and the Send.

Iran is bounded on the north by the Soviet Union and the Caspian Sea, on the south by the Persian Gulf and the Sea of Oman, on the east by Afghanistan and Pakistan, and on the west by Iraq and Turkey. With an area of somewhat more than 1,648,000 square kilometers, it forms an irregular quadrangle; the longer diagonal of which is approximately 2,210 kilometers from the northwest to the southeast angle, i.e. from Mount Ararat to Govater Port. The shorter diagonal is approximately 1,400 kilometers from the northeast to the southwest angle, i.e. from Sarakhs to the mouth of the Arvand Rud (Arvand River). It is located between latitude 25 to 40 and longitude 44 to 63 east of Greenwich Meridian.

DEFINITIONS

RIVER BASIN: A wide area of land bordered by mountain ranges and drained by a river and its tributaries.

DISCHARGE: The quantity of water discharged in one second, at a given section of a river.

CURRENT METER: A device for measuring the velocity of a river's flow.

OSTAN AND FARMANDARIKOL: The largest administrative divisions of Iran, corresponding to a province. In 1352, the country was made up of twenty ostan and three farmandarikols.

SHAHRESTAN: An administrative subdivision of an ostan or farmandarikol. There were 152 shahrestans in Iran in 1352.

BAKHS: An administrative subdivision of a shahrestan. Each bakhsh is composed of two or more dehestans.

DEHESTAN: An administrative unit composed of a group of villages or hamlets, which usually has a natural boundary.

SHAHRDARY: A municipality, regardless of size, with a government administration headed by a mayor.

PART 2
CHAPTER XIII
WATER

SECTION 1- SURFACE WATER

TABLE 1- LOCATION AND TECHNICAL

Name of dam	River	Location	Capacity of reservoir (Million cu. m.)		Regulated annual capacity (Million cu. m.)
			Total capacity	Working capacity	
Mohammad Reza Shah-e-Pahlavi.....	Dez	Dezful	3,340	2,480	6,938
Shahbanu Farah.....	Sefidrud	Manjil	1,800	1,200	2,000
Amir Kabir.....	Karaj	Karaj	205	175	400
Shanaz-e-Pahlavi.....	Abshineh	Yalfan Hamadan	8	5	17
Shah Esmail.....	Golpayegan	Akhtekhan	50	45	50
Farahnaz-e-Pahlavi.....	Jajrud	Latiyan	95	85	245
Shah Abbas-e-Kabir.....	Zayandehrud	Esfahan	1,250	1,090	1,200
Shahpur-e-Avval.....	Mahabad	Mahabad	230	190	195
Kurosh-e-Kabir.....	Zarinehrud	Bukan	650	486	535
Aras.....	Aras	Qezzel Qeshlag	1,350	1,150	400
Voshaghir.....	Gorganrud	Sangarsanar Gorgan	79	50	100
Dariyush-e-Kabir.....	Kor	Dorudzan	993	860	526

(1) Also supplies part of drinking water of Tehran.

(2) Also supplies Hamadan drinking water.

(3) The construction of Shah Esmail Dam was completed in 1336 but it was added to height in 1350.

(4) Irna's Share.

(5) Also supplies Shiraz drinking water.

PART 4
CHAPTER XX
OIL AND GAS

CHAPTER XX

OIL AND GAS

The collection of statistics on oil dates back to the time when the former Irano English Oil Company was active in Iran. After Nationalization of the Oil Industry in 1329 the compilation of statistics on this sector was continued and improved through the application of modern methods and techniques in this field. Tables appearing in this chapter have been derived from the statistical publications of the National Iranian Oil Company, and dates referred to are based on the Gregorian Calendar.

Metric system equivalents of weights and measures in this chapter:

one cubic metre = 999.97 litres
one cubic metre = 264.17 U.S. gallons
one cubic metre = 35.31 cubic feet
one cubic metre = 6.29 barrels (U.S.)
one U.S. barrel = 158.98 litres
one U.S. barrel = 42.00 U.S. gallons
one U.S. barrel = 0.16 cubic metre
one short ton = 2000 pounds
one short ton = 0.89 long ton
one short ton = 0.91 metric ton
one long ton = 7.49 barrels approximately
one long ton = 1.12 short tons
one long ton = 1.01 metric tons

SECTION 1- GENERAL CHARACTERISTICS

TABLE 1- PRODUCTIVE WELLS BY OIL FIELDS FOR THE PERIOD UP TO THE END OF 1973

Oil fields	Exploration date of the first well	Depth of oil reserve (foot)	Wells under operation 1973	Total production in 1973 (1,000 barrels)	Production from the exploration date up to the end of 1973 (1,000 barrels)	Density
Masjed Soleyman.....	1908	2,500	16	6,537	1,347,207	38

PART 4
CHAPTER XIII
ENERGY AND ATOM

CHAPTER XXII

ENERGY CONSUMPTION AND ATOMIC POWER

The information in this chapter deals with two facets of energy: general energy consumption and the use of atomic power in Iran.

Eight tables present information on energy consumption. These contain the results of several studies conducted by the Plan Organization. Three tables deal with atomic energy. Research projects on the use of atomic energy in scientific fields began with the conclusion of a contract between Tehran University and the United States Government for the purchase of a reactor in 1347.

Research projects on atom and use of atomic energy in scientific fields were started subsequent to a contract which was concluded between the Tehran University and the U.S. Government for the purchase of an atomic reactor.

The reactor is a pool type research set, 5 MGW power, thermal energy. It has 23 fuel elements, containing enriched 93 percent uranium, and 3 control rods, it produces 120 MWH energy for each 7 grammes of uranium.

To secure the reactors' fuel, a tripartite agreement was concluded between the Iranian Government the U.S.A. and the International Atomic Energy Agency in 1343 and the reactor was put to use at the University's Atomic Center in 1345.

The Center has included in its three-year programme, the production of the following radioisotopes for use in medical, agricultural and industrial fields:

Sodium(Na-24); potassium(K-40); iodine(I-131); phosphorus(P-32); gold(Au-198); technetium(Tc-99); sulphur(S-35); molybdenum(Mo-99) and indium(In-113).

Isotopes used in the Atomic Center and other institutions are:

Po - 210	Yttrium - 88
Ca - 45	Hg - 197
Co - 57	Radium - 226
Uridine - 5-H^3	Chlorine - 36
Thyamidin - 6-H^3	Rd - 86
American	C- 14
Na - 22	Fe - 59
Ceasium - 137	Fe - 55
Manganese	Cr - 51
Cobalt - 60	

B.T.U. (British Thermal Unit) = the amount of heat needed to raise the temperature of one pound of water one degree Fahrenheit.

SECTION 1- GENERAL CONSUMPTION OF ENERGY

TABLE 1- ENERGY PRODUCTION IN IRAN BY TYPE, 1966-1970
(Million metric tons of coal equivalent)

Year	Total	Coal and lignite	Crude petroleum	Natural gas	Hydro-electricity
1966.....	139.270	0.285	137.078	1.846	0.061
1967.....	172.076	0.290	169.751	1.953	0.082
1968.....	186.623	0.297	184.128	2.091	0.107
1969.....	223.214	0.309	219.034	3.704	0.167
1970.....	264.737	0.323	249.262	14.949	0.203

PART 7
CHAPTER XXXIII
HOUSEHOLD BUDGET

SECTION 1- URBAN AREAS

TABLE 1- AVERAGE EXPENDITURE ON FOOD AND NON-FOOD ITEMS CONSUMED BY AN URBAN HOUSEHOLD IN 30 DAYS BY MAIN ITEMS, 1347-1351

Main items	1347	1348	1349	1350	1351
Total expenditure	8,386.3	7,570.4	9,654.4	9,261.8	10,994.4
Food and tobacco	4,142.7	3,893.0	4,503.3	4,345.3	4,789.4
Non-food items	4,243.6	3,677.4	5,151.1	4,916.5	6,205.0
Clothing and footwear	572.9	461.7	480.8	786.2	703.6
Housing	1,373.2	1,348.1	1,965.4	1,390.7	2,110.9
Water, fuel and lighting	362.6	295.2	370.4	461.7	524.0
Household effects	406.3	288.7	419.8	45.1	510.7
Home services and non-durable goods	192.3	153.6	234.8	188.2	278.2
Medical care and health	393.5	272.1	279.6	-46.8	422.1
Transportation	368.8	312.4	354.3	322.9	585.8
Education	114.9	158.1	281.9	234.7	306.0
Recreation	72.9	48.8	164.7	192.9	186.1
Personal care, miscellaneous	386.3	338.7	499.4	547.5	577.6

PART 10
CHAPTER 14
POLITICS

CHAPTER IXL

POLITICS

This chapter presents information on Iranian diplomatic delegations in various countries and on foreign delegations in Iran. The chapter contains statistics on the number of Iranian diplomats abroad and on Iran's agreements and protocols with other countries, by type of agreement or protocol. It also lists the number of deputies in the Houses of Parliament and in the Ostan and Shahrestan councils. The organization of the Imperial Government of Iran is presented in a table, wherein organizations under the new civil code, and those excluded, are indicated by type.

Use has been made of the following sources in the preparation of this chapter:

- Green Book, Ministry of Foreign Affairs.
- Governments in the Era of Constitution
- Deputies in Twenty-One Parliaments
- Archives of the General Department of Parliamentary Affairs and General Elections, Ministry of Interior.
- Archives of the State Organization for Employment and Administrative Affairs.
