

# 5 Agriculture, Forestry and Fisheries

## **T***Introduction*

The first National Survey of Agriculture was conducted in the year 1339 by the Department of General Statistics of the time as sampling. After the implementation of several sample surveys of which the results for the years 1350 and 1351 were released, the SCI took the first census of agriculture in rural areas in the year 1352. In this census, the required data were collected through visiting all rural areas. Data on agricultural activities in urban areas and nomadic households with no residential place in rural areas of the country were not included in this survey. On the basis of the statistical frame resulted from the above census, the SCI conducted the Survey of Agriculture in rural areas in the years 1353, 1354, 1356 to 1359, as well as the years 1361 and 1366, and then released the results.

In the year 1360, by carrying out the project of preparing a rural gazetteer, *Jahad-e-Sazandegi* gathered similar information as the results of the 1352 Census of Agriculture in rural areas taken by the SCI.

The SCI conducted the first National Census of Agriculture in the year 1367 in urban and rural areas by visiting settled and unsettled households to collect data on all agricultural holdings of natural persons as well as data on holdings belonged to legal entities by identifying all places used by them for agricultural activities. Using the frame of this Census, the SCI took the first Sample Survey of Agriculture in the year 1371. Through the Survey, which covered only farming activities of agricultural holdings, data on production, value of products, production cost of principal crops etc. for the year 1370 were collected.

The second national census of agriculture was taken in the year 1372 by the SCI. In the census, some cities or urban districts in which the number of the holders' households was not significant in the 1367 Census were excluded. According to the

calculations, the proportion of urban holders' households, arable lands under crops, area with orchards and nurseries, and livestock were 1.7%, 2.5%, 3.2% and 1.3% of the total country in the year 1367.

In the year 1382, the third National Census of Agriculture was taken in collaboration with the Ministry of *Jihad-e-Agriculture*. In this census, all areas of the country, excluding 108 cities, were listed as the selected cities. In the year 1381, by using information available in the Ministry as well as conducting local researches, a list of agricultural holders of selected cities were prepared in the form of the project "Census of Agricultural Holders in Selected Cities".

In the year 1384, for the first time, Survey of Livestock Farms was conducted jointly by the SCI and the Ministry of *Jihad-e-Agriculture* based on the statistical frame developed from the 1382 National Census of Agriculture.

The 1393 National Census of Agriculture was the fourth one which was conducted through the Country from the 5<sup>th</sup> of Meher to 18<sup>th</sup> of Aban. The results of this Census comprises a wide range of statistical information which are published on various tables electronically and in a hard copy.

In the year 1369, statistics for modern cattle farms were, for the first time, collected by the SCI. In this project, the lists of modern cattle farms obtained from the 1367 National Census of Agriculture were used. The same survey was conducted in the year 1373, as a census, and as a sample survey in the years 1375, 1379 and 1386 by the SCI and in the year 1383 by *Jihad-e-Agriculture*, the results of which were disseminated.

Until the year 1346, statistics for the livestock slaughtering used to be released by the Statistics Bureau of the Finance Ministry. From 1347 to 1375, the related data were collected and released by the SCI through inquiring the municipalities or based on monthly reports of those having

slaughterhouses. Since 1376, the mentioned data have been collected from slaughterhouses in collaboration with the State Veterinary Organization and municipalities.

For the first time, in the years 1364 and 1365, the SCI took the survey of chicken farms. Due to the variety of chicken farming activities in recent years, the SCI has taken separate surveys to collect data on different activities - including a census on raising layer chicken and pullet, a census on raising breeder chicken, a census on incubation, and a sample survey on broiler chicken raising.

Until the year 1375, the value added table of agricultural activities in the previous yearbooks used to be prepared according to the Central Bank publications. However, as the SCI has compiled Iran's National Accounts based on 1993 SNA since the year 1370, statistics for value added included in this chapter are according to the national accounts produced by the SCI as of the year 1380.

In addition to different publications of the SCI, reports and publications of the following organizations have also been used as the source of the information included in this chapter:

Ministry of Jihad-e-Agriculture, Ministry of Energy, Agricultural Support Services Company, Iran Fisheries Organization (SHILAT), Forests, Range and Watershed Management Organization, Central Organization of Rural Cooperatives and Ministry of Cooperatives.

Statistical information included in this Chapter contain statistics on temporary crops and permanent crops, livestock and poultry, forestry, fisheries and related cooperatives. Moreover, end of this chapter include two tables on value added of "agriculture, hunting and forestry" and "Fishing" activities.

#### *Definitions and concepts*

**Agricultural holding:** all agricultural activities run by a single management is an agricultural production unit, which is called agricultural holding. This unit is managed by members of one or more households (natural persons) or by an authorized company or a public institution (legal entity). In the 1382 National Census of Agriculture, if activities of an agricultural production unit are performed within some

villages or cities limit, each unit located in a single village or city limit is considered an agricultural holding. In the mentioned census, holdings engaged in at least one activity matching one of following definitions were counted:

**Temporary crops:** holdings with at least 400 square meters of arable land at the time of enumeration.

**Permanent crops:** holdings with at least 200 square meters of orchards and nurseries at the time of enumeration.

**Raising of large livestock:** holdings raising large livestock (cows, buffaloes and camels) which have had at least one large livestock during the last 365<sup>(1)</sup> days.

**Raising of small livestock:** holdings raising small livestock (sheep and goats) which have had at least two small livestock during the last 365<sup>(1)</sup> days.

**Raising of poultry via traditional method:** holdings raising at least 10 hens, roosters, chickens or other types of poultry through traditional method, on the day of enumeration.

**Greenhouse production:** holdings having activity in this field in every size during the intended crop year.

**Sericulture and apiculture:** holdings having activity in this field in every size during the last 365 days.

**Agricultural holder:** is a natural or legal person who individually or jointly exercises management control over the agricultural holding. The holder has technical and economic responsibility for the holding as well as direct role in its profit and loss.

**Arable land:** land allocated to farming (cultivation of annual plants), either under cultivation or left fallow.

**Irrigated arable land:** is a cultivated land in which the crops growing are irrigated.

**Rainfed arable land:** cultivated lands that are not irrigated but left to be watered through precipitation.

**Area under cultivation:** area allocated to crop production in the year of the survey implementation that has been cultivated in the same year or the year before.

**Fallow:** the part of arable land, irrigated or rainfed, which is included in crop alternation, but has not been cultivated in the given agricultural

year and from which no crop would be harvested.

**Crop year:** begins on Mehr 1st and lasts until the end of Shahrivar in the next year.

**Annual crops:** mostly herbaceous plants whose stems are destroyed by harvesting and whose subterranean organs (as root, bulb, etc.) remain, in some cases, in the earth, like: wheat, sugar beet, vegetables and saffron.

**Perennial crops:** are plants with wooden stems or trunks, all or some parts of which will remain in the earth to crop the next year. Different types of fruit trees like citrus and peach trees, vines and tea plants as well as fruitless trees like poplar are considered as perennial crops.

**Modern irrigation and drainage network:** comprises installations for irrigating, draining and supplying water to arable lands with an area about 60 to 200 hectares. The network, equipped with systems for water control, distribution and measurement, procures water in normal hydrologic conditions with at least 80% guarantee.

**Dam:** see Chapter 9, Definitions and concepts.

**Production:** the quantity of the products obtained through the production process during a definite period of time in the agricultural production unit which is ready for sale and consumption. In the statistical surveys of the SCI, the share of agricultural crops produced free of charge, or the compensation of which is paid in kind or is consumed by the same agricultural production unit is included with the production.

For agricultural crops, production refers to the common form of the crop after harvesting: weight of paddy for rice production, weight of dried seed for beans, weight of dried forage in case of alfalfa, sainfoin and clover, weight of nuts peeled but in the shell in case of walnut, almond, and pistachio, and number of trees for fruitless trees as poplar.

**Modern cattle farm:** an agricultural production unit where cattle are raised according to modern procedures and methods with respect to the characteristics of the place, rearing, feeding, and health.

**Broiler chicken:** hen or rooster reared for its meat.

**Layer chicken:** these chickens, called pullet when three months old, are reared to produce edible

eggs.

**Shell-less eggs:** eggs lacking the outer hard shell.

**Breeder chickens:** fertile eggs of this breed are used to produce chickens. Breeder chickens of broiler and layer breeds are reared to produce chickens of the same breed.

**Production of one-day-old chickens:** through the processes of this activity, depending on the case, fertile eggs of layer and broiler chickens turn into one-day-old chickens of ancestor and breeder hens, roosters, layer and broiler breeds.

**Workers:** include all people working inside or outside of the establishment, full-time or part-time, with or without wage and salary (owners, active partners and unpaid family workers).

**Compensation of wage. salary earner:** wage, salary and other payments (money, goods, etc.) received by wage. salary earner.

**Wage and salary:** all payments in kind or in cash to the wage .salary earners by the establishments.

**Other payments (money, goods, etc.):** includes bonus, overtime, food and clothing allowance, commuting allowance, child allowance, spouse allowance, mission allowance, unfavorable climate allowance, employer's share of social security premium, food stuff, bus ticket, etc.

**Investment (value of changes in capital properties):** changes in the value of capital properties (value of purchase or obtaining of capital properties plus cost of major repairs minus sale or transfer value of these properties) during a definite period of time.

**Capital properties:** all machinery, equipment and tools usually used in manufacturing activities or for rendering services with an economic life of more than one year. Machinery and power equipment, durable tools and implements, office equipment, vehicles and buildings, are examples of such properties.

**Cooperative:** refers to company composed of at least 7 natural persons as members who finance either whole or 51 percent of the capital. It is registered according to regulations in the law of cooperative sector. It should be noted that before determining the minimum number of the cooperatives' members under the mentioned law, some of the cooperatives were established with less than 7 members.

**Delineation:** exact estimation of the area and

admitted limits of one or more range men in a range.

**Water trough:** shallow wells supplying livestock drinking water only.

**Shallow wells:** wells dug in mountainsides to supply livestock drinking water. Water of these wells rises to the surface without pumping like artesian wells or springs.

**Water basin:** see Chapter 1, Definitions and concepts.

**Watershed areas:** lands lying in the river basin leading running water resulted from precipitation to the lake.

**Watershed management:** activities performed for the reclamation and restoration of watershed areas.

**Output:** see Chapter 23, Definitions and concepts.

**Intermediate consumption:** see Chapter 23, Definitions and concepts.

**Value added:** see Chapter 23, Definitions and concepts.

### *Selected information*

In the year 1393, more than 575 thousand tons of various types of aquatics were produced and caught, out of which over 39 thousand tons were from the northern waters and more than 535 thousand tons from the southern waters.

In the year 1388, the value added of this sector comprising the activities on "agriculture, hunting and forestry" as well as "fishing" at the current prices and at the 1376 constant prices was 342578 and 59315 bln rials respectively.

In the 1393 National Census of Agriculture, a number of 4042811 holders were identified and listed nationwide which for 10344 holders no questionnaire was filled out due to various reasons. Share of this part of holders was 21% in rural areas and 56% in urban areas. The statistics in this publication does not include holders without questionnaire.

Based on the results of this Census, Nation's arable lands were about 16477 thousand hectares. These lands were used by 3359 thousand agricultural holders and were under cultivation of temporary crops and permanent crops; the share of each holder is, on average, about 4.9 hectates.

Out of the total Nation's agricultural lands, 46.2% are irrigated lands with the average of 2.9 hectares for each holding, and the rest of the lands are rainfed with the average of 6.9 hectares for each holding.

696 thousand of agricultural holdings raise cattels. The number of cattles in these holdings are 4232 thousand, of which 75% are cows.

6191 hectares of 13781 agricultural holdings are greenhouses the products of which are flowers, ornamental plants and various perennial and annual crops.

Based on the results of this Census, 1221 thousand holdings are raising poultry by traditional method, 52192 holdings are engaged in apiculture activity and 8644 holdings are carrying out sericulture practice.

1. Increase in the number of small livestock (sheep, lamb, goats and kids) is due to development of livestock raising farms as well as different implementation times of the 1384 Livestock Farm Survey and the 1382 Census of Agriculture. The Census was conducted in the month of Mehr when the number of small livestock was at its minimum (over the year), while the Survey was implemented in the months of Day and Bahman coinciding with the time of giving birth of small livestock, when the number of sheep and goat population was at its maximum level.

Statistics for buffalo and camel and their calves will be presented after the publication of the detailed results.

1. Referring to female livestock that has given birth during the last 365 days to the census day and been milked. The livestock whose whole milk is used by its baby is not considered livestock milked.

2. Difference between the total and sum of its parts is due to buffalo and camel milk production.
