Dey	22 December-20 January
Bahman	21 January-19 February
Esfand	20 February-20 March

Iranian year begins on March 21^{st} of the Christian year and ends on March 20^{th} of the next year. To convert the Iranian year into Christian year, add 621 to the former.

IN THE NAME OF ALLAH THE COMPASSIONATE, THE MERCIFUL

Preface

The Statistical Yearbook of Iran contains the latest statistical information available on economic, social and cultural areas of the country to meet the statistical data needs of the local decision makers, planners and researchers, as well as all other interested users. The Yearbook was first officially compiled in the year 1345 and has been released regularly.

The major sources of the Yearbook include: (a) the results of censuses and sample surveys conducted by the Statistical Centre of Iran (SCI), (b) the results of surveys conducted by other organizations, and (c) administrative data. Since population censuses are taken every 5 years and also some other censuses and surveys conducted by the SCI or other organizations are not taken at regular intervals, some of the Yearbook's statistical items are not represented by a complete range of data.

In order to make timely provision of important statistical information to meet the needs of users and reduces their references to various organizations producing statistics, the SCI has attempted to have timely release of different statistical publications including the Statistical Yearbook, and also developed the Statistical Information Database.

The SCI Publication Database, a part of the SCI Statistical Information Database, which contains 4780 titles, is accessible on our website, www.amar.org.ir as of 1381. The Database is continuously updated and enjoys the capability of advanced search which provides swift and easy access to the existing information.

In addition to the cited database, the information on the Statistical Yearbook is also accessible at http://salnameh.sci.org.ir with various capabilities as of the year 1387.

The 1391 Statistical Yearbook of Iran is published in both Persian and English. The bilingual CD-ROM version is also available. In addition, the statistical yearbooks of 31 Ostans (provinces) are released by Deputies for Planning of Offices of Governor Generals nationwide (the former local branches of the Management and Planning Organization) with similar format under supervision of the SCI.

Before going through the chapters, users are recommended to study the introductions which take in the definitions and concepts concerned and the subject-matter coverage of the statistical items. Further, they provide readers with justifications for unavailability of some timely data or exclusion of some statistical items.

It is noteworthy that the beginning of the yearbook includes selected information of all chapters which has been added to the introduction of the related chapter, too. In order to have a general view on all information presented in the Yearbook, its reading is recommended.

Particular thanks and appreciation are extended to all *Deputies for planning offices*, and *Director-Generals of Statistics and Information offices* of the ministries, organizations and the Islamic Revolution institutions, as well as all their colleagues who helped us in this great job. Their generous and valuable assistance contributed a lot to preparation of the Yearbook. We hope to enjoy their cooperation and contribution continuously for enhancing the yearbook quantitatively and qualitatively.

Thanks to all staff of the Statistical Centre of Iran who contributed to the preparation and production of this publication.

Adel Azar Head, Statistical Centre of Iran

Selected information

ran comprises a land area of over 1.6 million square kilometers. It lies on the southern half of the northern temperate zone, between latitudes 25° 00' and 39° 47' north, and longitudes 44° 02' and 63° 20' east. The land's average height is over 1200 meters. The lowest place, located in Chaleh-ye-Loot is only 56 meters high, while the highest point, Damavand peak in Alborz Mountains, rises as high as 5610 meters. The land height at the southern coastal strip of the Caspian Sea is 28 meters lower than the open seas.

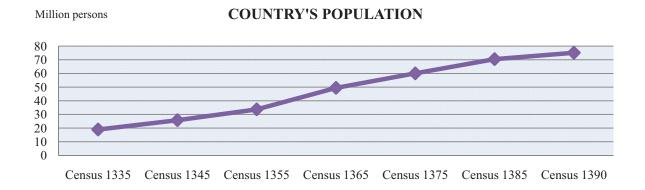

Iran is bounded by Turkmenistan, Caspian Sea, Azerbaijan, and Armenia on the north, Afghanistan and Pakistan on the east, Oman Sea and Persian Gulf on the south, and Iraq and Turkey on the west.

In the year 1391, I.R. Iran was divided into 31 Ostans (provinces), 422 Shahrestans (subprovinces), 1041 Bakhshes (counties), 1224 Shahrs (cities) and 2566 Dehestans (rural agglomerations).

On the basis of the Population and Housing Census taken in Aban 1390, the total population of the country was 75149669 persons (comprising 50.4% male & 49.6% female); compared to the result of the 1385 Census, the average annual population growth was 1.3%.

In the 1390 Census, there were 21.2 million households out of whom 72.82% were settled in urban areas and the rest (27.12%) was settled in the rural areas. In the mentioned year, the mean age for men and women was 29.8.

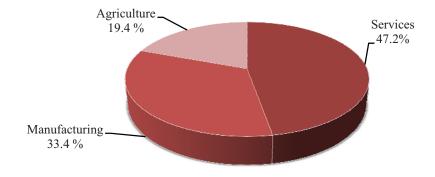

In the year 1391, over 1.4 million births were registered out of which 48.7 percent were female. Moreover, about 830,000 marriages and 150.3 thousand divorces were recorded over the year 1391, showing a decrease of 5.1% and an increase of 5.2% respectively in comparison with the preceding year.

In the year 1391, about 37.4% of population aged 10 and over were considered economically active, with an unemployment rate 12.1%. Unemployment rates for male, female, in urban and rural areas were 10.4, 19.7, 13.8, and 8.2 percent respectively.

Amongst Ostans of the country, Lorestan, Ilam, and Fars with 20, 17.2 and 16.7 percent had the highest unemployment rate and South-Khorasan, Kerman, and Khorasan-e-Razavi with 6.3, 7.7 and 8.6 percent had the lowest unemployment rate of the country respectively.

RELATIVE DISTRIBUTION OF EMPLOYED POPULATION AGED 10 AND OVER BY THREE MAJOR ECONOMIC ACTIVITIES, THE YEAR 1391

In the year 1391 the area of zones protected by the Iran Department of Environment was about 17740619 hectares of which the Ostans of Kerman with 2456926 hectares and Qazvin with 25344 hectares had the highest and lowest areas, respectively.

In the same year, the number of conflagration in forests and ranges was 1183 which shows a 11 percent fall in comparison with the previous year.

In the same year the volume of collected wastewater was 3021291 cu m which shows a 5.5 percent rise compared to the year 1390. The Ostans of Tehran and Isfahan had the highest share of collected wastewater with 18.96 percent and 14.93 percent, respectively and the Ostans of South Khorasan and Kohgiluyeh & Boyerahmad with 0.31 percent and 0.10 percent had the lowest respectively.

In the year 1390 among the pollutant and greenhouse gases resulted from the burning of fuels by the transportation sector, the CO2 with 126377800 tons (93 percent) had the highest share. Most

of the CO2 was resulted from the burning of gas oil and the lowest one goes to the burning of liquefied gas.

In the year 1391 about 38.82 percent of the population of the country were under the coverage of the network for collection and transmission services of urban sewage which shows a 1.52 percent rise compared to the previous year. The highest and lowest shares of the population under the coverage of this network belong to the Ostans of Kordestan and Kerman with 98.87 and 5.96 percent, respectively.

In the year 1391, 74 percent of hospitals enjoyed an appropriate solid waste management system moreover; 74 percent of hospitals had an appropriate sewage management system which shows a 6.3 percent decrease and a 1.4 increase in comparison with the previous year, respectively.

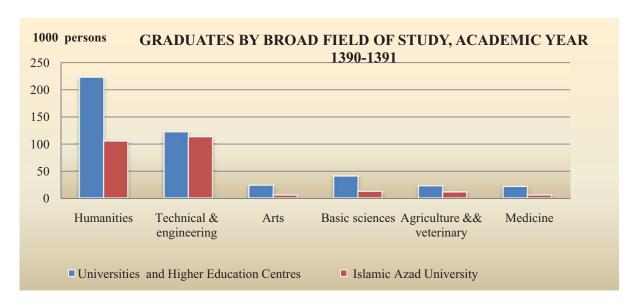

During the academic year 1391-1392, over 6 million and 850 thousand persons were studying in primary schools, about 2 million and 134 thousand persons were in lower secondary schools and over 3 million and 709 thousand persons were in general secondary schools. Compared to the previous year, the primary and upper secondary courses increased by 20.16 and 10.61 percent and the lower secondary experienced a decline of 34.43%, respectively.

Total number of university students over the academic year 1391-1392 was about 4 million and 435 thousand persons, indicating a decrease of 0.52% compared to the previous year. Share of the Islamic Azad University students out of the total number of university students was 35.7 percent. Out of the total number of the students, 21.04% were studying for associate degree, 65.78% for bachelor's degree, 10.45% for master's degree and 2.7% for professional doctorate and PhD.

Total number of university graduates during the academic year 1390-1391 was 711,000 persons.

UNEMPLOYMENT RATE, THE YEAR 1391

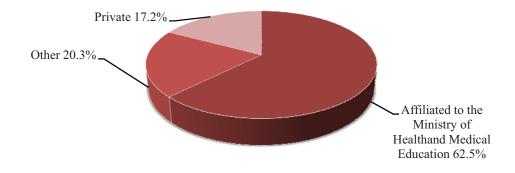

In the year 1391, over 34,000 physicians were employed in the Ministry of Health and Medical Education. Out of the cited number, 14639, 2988, and 1317 persons were general practitioners, dentists, and pharmacists respectively. Also over 203,000 paramedics were working.

In the year 1391, about 131,000 beds were in use in 850 medical establishments (hospitals, maternity hospitals and sanatorium) of the country. It should be noted that 62.5 percent of the above mentioned establishments are affiliated to the Ministry of Health and Medical Education.

DISTRIBUTION OF MEDICAL ESTABLISHMENTS BY LEGAL STATUS, THE YEAR 1391

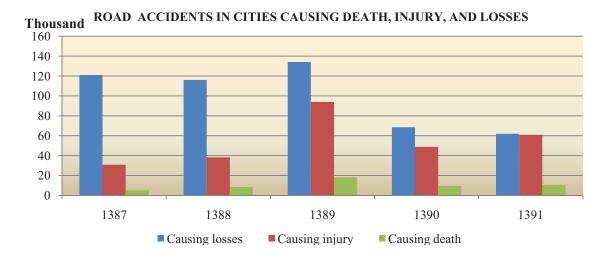

Moreover, in the same year, 11197 health care and medical centres (clinic, poly clinic and health centres) were operating in the country, which increased by 3.7 percent in comparison with the preceding year. In the mentioned year, there were 5207 medical diagnosis laboratories, 5337 rehabilitation centres, 3231 radiology centres and 9501 pharmacies in the country. In the year 1391, about 3 million and 603 thousand cases in general courts and about 600 thousand

In the year 1391, about 3 million and 603 thousand cases in general courts and about 600 thousand cases in appeal courts were settled nationwide.

In the year 1391 about 646 thousand robberies were registered by the Police Department of the I.R of Iran which shows a 49.8 percent increase in comparison to the preceding year.

In the year 1391, the number of the inter-city car accidents with a 5.2 % increase reached about 133,000 cases, out of which 7.9% of accidents resulted in death, 45.7 % in injury and 46.4% in losses. Also in the same year, the number of the intra-city car accidents with 9.7 % increase, in comparison with the previous year, reached 296,000 cases, out of which 1.5% resulted in death, 55.9 % in injury, and 42.5% in losses.

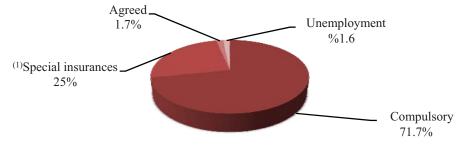

According to the results of the 1390 Population and Housing Census, about one million and 18 thousand persons have at least one type of disability, of whom 62.6% accounted for male. It should be mentioned that about 81 percent of the disabled persons have one type of disability only.

At the end of the year 1391, the number of establishments covered by the Social Security Organization was about one million and 195 thousand. At the end of the year 1391, the principal insured persons covered by the mentioned Organization increased to about 12 million and 287 thousand persons, showing a rise of 6.9% compared to the year 1390.

In the year 1391, beneficiaries (principals and dependents) of medical services covered by Medical Services Insurance Organization were over 34 million persons, of whom 18%, 8.8%, 67.8% and 5.4% enjoyed government employees insurance, Iranian insurance, villagers insurance and the insurance of other groups respectively.

THE PRINCIPAL INSURED PERSONS COVERED BY THE SOCIAL SECURITY ORGANIZATION BY TYPE OF INSURANCE AT THE END OF THE YEAR 1391

1. Including insured persons in own account occupations, weavers, drivers, voluntry, construction worker sand others.

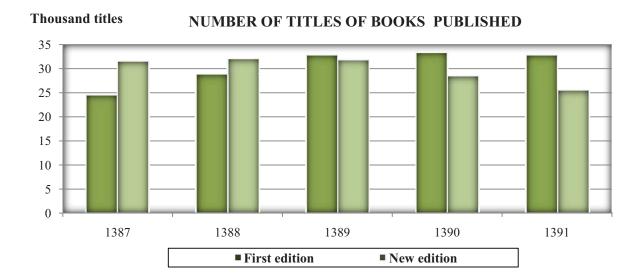

In the year 1391, programs produced by national and international radio channels of the I.R.I B were about 263,000 hours which increased by 8.9% compared to the previous year. Also in the same year, the national and international TV channels of the I.R.I. B produced about 94,000 hours of programs showing a decrease of 3.9 percent in comparison with the preceding year.

During the same period, the number of titles of the press and periodicals published in Tehran and other cities of the country was 3025 and 2581 indicating a rise of 14.6% and 14.3% respectively in comparison with the preceding year. Moreover, 200 titles of the said press and periodicals were published daily while 756 titles were published weekly.

Over the same period, more than 58,000 titles of books with a circulation of about 152 million copies, authorized by the Ministry of Culture and Islamic Guidance, were printed and published, which decreased 5.7% and 12.4% respectively compared to the previous year.

Attendances at museums and historical monuments, managed by Cultural Heritage and Tourism Organization during the year 1391 were more than 21 million persons representing a decline of 1.3 percent compared to the previous year.

Furthermore, in the year 1391, the number of foreign tourists arrived in the country was more than four million and seventy thousand persons indicating an increase of 23.6 percent in comparison with the preceding year.

According to the results of the 1382 National Agricultural Census, a number of 4,332,000 agricultural producing units have been recognized as agricultural holdings.

In Mehr 1382, the area of the agricultural lands of the country was 17.7 million hectares including lands under annual crops, fallow, orchard and nursery. The area of the lands under annual crops, fallow and orchard and nursery is reported 11.6, 4.6 and 1.5 million hectares respectively. Also, the area of land under irrigated crops was over 8.3 million hectares.

On the basis of the results of the said census, during the crop year 1381-82, area under cultivation and production of main agricultural crops was as follows:

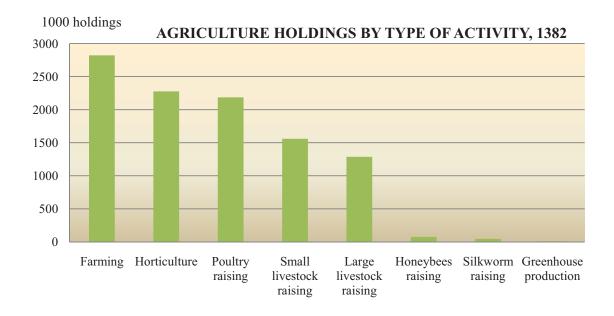

Wheat: area under cultivation, 6,900,000 hectares, production 11.7 million tons, yields in the irrigated wheat, 3.1 tons per hectare and non-irrigated wheat, more than 0.9 tons per hectare.

Rice: area under cultivation, 465,000 hectares, production 1.82 million tons, yields in hectare, more than 3.9 tons.

Production of the orchard crops:1.15 million tons apples, 1.3 million tons citrus fruits, 1.4 million tons grape and more than 0.5 and 0.3 million tons date and pistachio respectively.

At the time of census (Mehr and Aban 1382) all livestock of the country consisted of 37 million sheep, 20 million goats, 6 million cows, 159,000 buffalos and 139,000 camels.

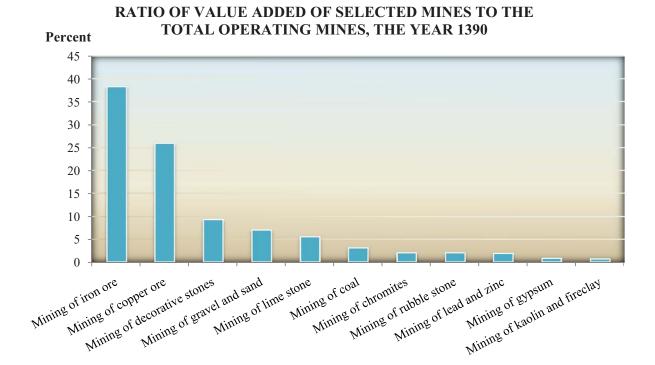

The area of the forests of the country was estimated 14.3 million hectares in 1391.

In the year 1390, there were 5246 operating mines in the country with a total of 84528 workers which shows an increase of 3.98 percent compared to the previous year.

In the same year, the value of the mines' production amounted to 65442 billion rials. Amongst different activities, iron ore, copper ore, and decorative stones, with 27277, 15442, and 5392 billion rials value respectively had the highest annual production values.

In the year 1390, the value added of the activities of the operating mines amounted to 47830 billion rials out of which the highest amount was for iron ore, copper ore, and decorative stone, with 18292, 12431, and 4426 billion rials respectively. The total of the value added obtained from these mines comprises about 73% of the total value added of this sector.

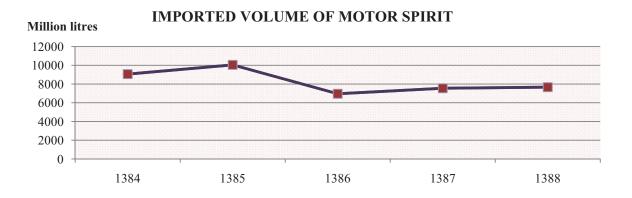

In the year 1388, a total of 750537 thousand barrels of crude oil were exported, which shows a 13.3% decrease compared to the preceding year. Also in the same year, the amount of oil products exports was 17 million liters per day due to a 6.3% rise compared to the preceding year.

Furthermore, in the same year, the production of some oil products in the total national refineries by cubic meter per day was: liquefied gas: 8362, motor spirit 59515, burning oil: 18519, and oil gas: 88702 which changed 3.6, 15.6, -13.2 and 4.4 percent compared to the preceding year.

In the year 1388, oil gas with the annual consumption of 33817 thousand cubic meters had the maximum share of consumption among all kinds of oil products and motor spirit with the annual consumption of 23652 thousand cubic meters was at the second rank.

Over the same year, out of 1105 cities of the country, 792 cities were supplied with piped gas and 57 cities were being supplied with piped gas, which shows that 72% of the country's cities are supplied with the piped gas. The total production of the National Company of the Petrochemical Industries with a 14.6% increase compared to the preceding year reached 34433 thousand tons in 1388.

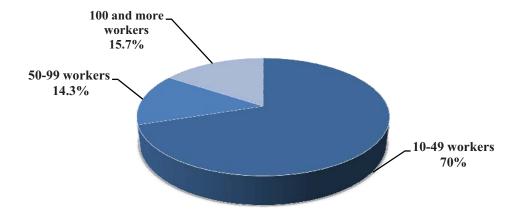

In the year 1390, there were 14962 manufacturing establishments with 10 and more workers having 1242983 employees, which declined by 2.2 and 0.4 percent respectively compared to the preceding year. About 98 percent of the mentioned establishments are owned by private sectors and 2 percent by public sector. Besides, from among the said number of workers, 18.9 percent were employed in the establishments with 10-49 workers, 11.7 percent in the establishments with 50-99 workers and 69.4 percent were employees of the establishments with 100 and more workers.

In the same year, the value-added of the activity of manufacturing establishments with 10 and more workers has been over 629249 billion rials which represents a 27.2% increase compared to the preceding year.

In the year 1390, more than 1256 thousand tons of vegetable oil, 1846 thousand tons of sugar and hard sugar, 63205 thousand tons of cement, 492 thousand tons of various types of paper as well as 1627697 sets of passenger cars and jeeps were produced in the manufacturing establishments.

DISTRIBUTION OF NATIONAL MANUFACTURING ESTABLISHMENTSWITH 10 AND MORE WORKERS BY SIZE, THE YEAR 1390

In aquatic year 1390-1391, the amount of annual discharge of the underground water resources was 64523 million cubic meters which decreased 8.4% in comparison with the aquatic year 1389-90.

In the year 1391, the inflow of the large reservoir dams was 38546 million cubic meters, with a 14.24% increase in comparison with the previous year. In this year, 25169 million cubic meters of large reservoir dams water have been consumed, 61.2 percent of which belongs to the agricultural consumptions.

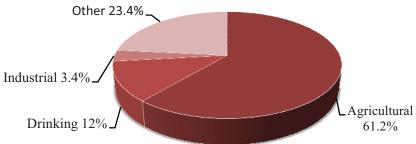

In the year 1391, there were more than 18,331,000 water extensions, which had a 5.9 percent increase in comparison with the preceding year. Out of this number about 13,614,000 extensions were for urban areas which had a 5.6% increase compared to the previous year.

In the same year, the gross electricity generation of institutions affiliated to the Ministry of Energy was 216688 million kilowatt-hours, more than 40.77 percent of which was produced in the steam power plants. Furthermore, the gross electricity generation had a 3.97 percent increase compared to the preceding year.

In the year 1391, percentage of electricity subscribers in house, public, agricultural and manufacturing sectors was 81.6 %, 4.1%, 1.0%, and 0.6 % respectively. Also in this year, the percentage of the electricity sold and consumed in house, manufacturing, agricultural, public sectors and for the streets lighting was 31.6 %, 34.6%, 16.3%, 9.2%, and 6.5% respectively.

At the end of 1391, a number of 54561 villages (about 4.3 million rural households) were electrified which increased by 0.8% in comparison with the previous year.

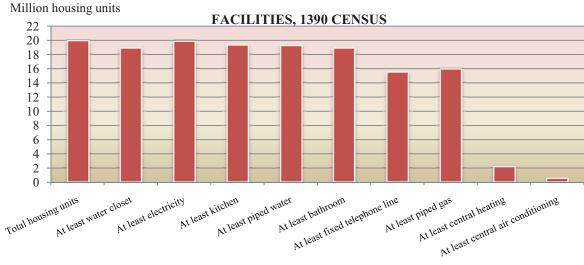

WATER CONSUMPTION OF LARGE RESERVOIR DAMS BY TYPE OF USE, THE YEAR 1391

In the year 1391, about 206 thousand construction permits with 117513 thousand square meters floor area were issued by municipalities which experienced a 3.1 percent decrease and 3.3 percent increase respectively in comparison with the preceding year. It is noteworthy that about 88 percent of the permits issued were related to the housing units.

In the year 1391, the value of investments made in urban areas by private sector for the newly started, semi-finished and completed buildings was about 612524 billion rials which increased by 51.85 percent in comparison with the year 1390.

In the year 1391, the cities of Tehran, Esfahan and Arak with 32373, 12419 and 11074 thousand rials had the highest average price and Yasuj, Kerman and Ilam with 2856, 4711 and 4704 thousand rials had the lowest average price per square meter of the housing unit's floor area transacted in the real estate agencies. Besides, in the same year, the cities of Tehran, Karaj and Qazvin with 152383, 57950 and 49925 rials had the highest average rental price respectively and Ilam, Yazd, and Shahr-e-Kord with 17297, 18681 and 19421 rials had the lowest average rental price per square meter of the housing unit's floor area transacted in the real estate agencies between the landlord and leaseholder.

ESTIMATED NUMBER OF CONVENTIONAL HOUSING UNITS BY TYPE OF

In the year 1391, the length of railway lines (main tracks, side tracks, industrial tracks), was 13011 kilometers which increased by 1.8 percent in comparison with the preceding year. In the same year, the length of the roads of the country was 81642 kilometers and the length of the rural roads was 195775 kilometers.

Over the same period, the number of passengers transported via railways was about 27,015,000 persons; the number of passengers transported via public road passenger vehicles (bus, minibus, passenger vehicles) was about 226 million persons; and more than 21 million passengers were transported via the airports.

There were more than 521 million intra-city parcels, more than 666 million inter-city parcels, 1,541,000 parcels dispatched abroad and 2,811,000 parcels from abroad during the year 1391. These amounts indicate a fall of 15, and a rise of 328.5 and 13.6 percent compared to the previous year respectively. Moreover, the number of fixed telephone lines in use was more than 27 million and 478 thousand, the number of mobile phone subscribers was more than 59 million persons. In the year 1391, a number of 52965 villages were connected to telephone facilities.

1000 billion rials

In the year 1391, the value of foreign trade transactions amounted to 1354 thousand billion rials, which had a 30 percent increase in comparison with the preceding year. Out of the stated value, 62 and 38 percent were related to the imports and non-oil exports respectively.

During the same year, 39 million tons of different goods with a value of 833 thousand billion rials (equaling 67 billion dollars) entered into the country via customs terminals, showing an increase of 23.8 percent in comparison with the preceding year. It should be noted that the highest value of imports relates to the UAE (20 percent of total value), China (15.4 percent of total value) and Republic of Korea (9.1 percent of total value). Moreover, in this year, 70 million tons of various kinds of non-oil goods with a value of 521 thousand billion rials (equaling 30 billion dollars) have been exported abroad via customs terminals which rose 40.3 percent in value compared to the preceding year. The highest value of these exports relates to the countries of Iraq (19.6 percent of total value), China (17.4 percent of total value), and UAE (12.1 percent of total value).

LIQUIDITY AT THE END OF THE YEAR

In the year 1391, liquidity (money and quasi money) of banking system was about 4607 thousand billion rials which increased by 29% compared to the previous year.

Over the same year, outstanding claims of the banking system on the public sector were about 910 thousand billion rials showing a rise of 42.6 percent in comparison with the previous year.

Outstanding claims of banks and non-bank credit institutions on non-public sector in the year 1391 were about 4139 thousand billion rials which increased by 17.7%, compared to the previous year.

Non-public sector outstanding deposits with the banking system in the year 1391 were about 4276.8 thousand billion rials which rose by 29.3%, compared to the previous year.

In the year 1391, the highest amounts of premiums received in the insurance market of the country for three fields were as follows: third party (44.7 thousand billion rials), health (21.3 thousand billion rials) and car body insurance (7.2 thousand billion rials) showing 45.1, 42.2 and 18.6 percent increase respectively compared to the previous year.

In the year 1391, value of the shares transacted for the eligible companies on Tehran Stock Exchange was about 257 thousand billion rials showing an increase of 13.5% in comparison with the previous year.

National budget resources for the year 1391 were predicted to form an amount of 5666 thousand billion rials, indicating a rise of 11.4 percent in comparison with the previous year.

Government revenues and cession of government capital and financial assets were predicted about 2360 thousand billion rials in the year 1392, indicating a rise of 43.5 percent in comparison with the previous year. In the year 1392, cession of capital assets with 29.8%, tax revenues with 24.1%, and revenues from government ownership with 11.9% account for the highest share of government revenues respectively.

Actual expenditure credits (current) for government agencies in Ostans in the year 1391 were about 41.9 thousand billion rials with a fall of 3.4 percent compared to the previous year. Moreover, Ostans' actual provision-of-capital-assets credits (development) were about 96.7 thousand billion rials in the year 1390 showing a rise of 35.1 percent in comparison with the previous year.

In the year 1389, gross domestic product of the country at market prices was about 625 thousand billion rials at constant 1376 prices, showing an increase of 6.3% compared to the year 1388.

During the same year, "manufacturing sector" with 20.26 percent, "wholesale and retail trade and repair of motor vehicles and goods" with 17 percent, "Real estate, renting and business activities" with 4.20 percent and "agriculture, hunting and forestry" with 10.2 percent had the highest share of value added in GDP at constant 1376 prices respectively.

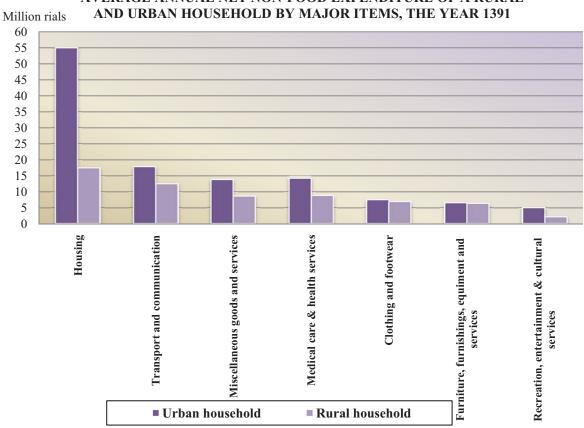

In the regional accounts sector in the year 1389, Ostans of Tehran and Khuzestan with 28.2% and 12.9% had the highest contribution and Ostans of South Khorasan and North Khorasan with 0.51% and 0.65% had the lowest percentages of share of GDP at current prices respectively.

In the year 1391, the average annual net expenditure of an urban household amounted to 164.3 million rials including 120 million rials for non-food expenditures (72.9 percent) and 45 million rials (27.1 percent) for food and tobacco which increased by 23.8 percent in comparison with the previous year.

In the year 1391, the average annual income of an urban household was about 167.2 million rials. Out of the income sources, miscellaneous incomes with 55.6 percent were of the highest share.

Also in the year 1391, the average annual income of a rural household amounted to 101.3 million rials. Out of the income sources, self-employment income with 46.4 percent was of the highest share.

AVERAGE ANNUAL NET NON-FOOD EXPENDITURE OF A RURAL

Consumer price indices for goods and services in urban areas with an increase of 28.6 percent in the year 1391, compared with the previous year, reached 128.6 (base year = 1390). Compared with the changes in the index of the previous year, this index got an increase of 2.2%. In the year 1391, consumer prices index for goods and services increased by 38.2 and 18.7 percent for two special groups "goods" and "services" respectively compared with those of 1390.

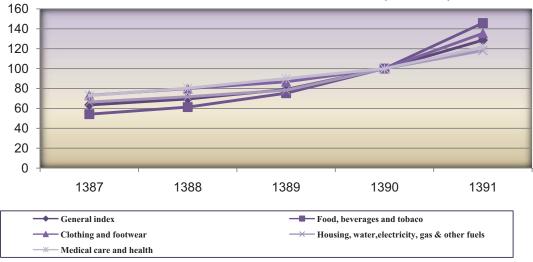

In the year 1391, the highest and lowest general index was for Ostans of Chaharmahal & Bakhtiyari and Kerman, namely 135.4 and 124.3 respectively.

Consumer prices index for goods and services in rural areas in the year 1391 increased by 33.8 percent compared to the year 1390 and reached 587.6 (base year=1381). The consumer prices index for goods and services of rural households for two special groups "goods" and "services", in the year 1391, as compared to the year 1390, increased by 36.8 and 20.9 percent respectively.

National producer prices index for the year 1391, compared with that of the year 1390 increased 29.6 percent and reached 367.4 (base year= 1383).

In the year 1391, price index for exported goods increased by 88.6 percent as compared to the year 1390 and reached 442.7 (base year= 1383).

Estimation shows that the population of the world in 2100 will be 10124 million. Asia and Africa with 4596 and 3574 million people are the most highly populated areas of the world.

Iran's area was 1628750 square kilometers in 2010 and stands at No. 14 in the rankings.

Russian Federation, Canada, USA, China, Brazil, Argentina and Kazakhstan are the vastest countries in the world, respectively.

In 2010, 2011 and 2012, the Human Development Index (HDI) for the Islamic Republic of Iran were 0.740, 0.742 and 0.742 respectively, which in the year 2010 was ranked 76th among the world's countries.

In 2012, life expectancy at birth in the Islamic Republic of Iran was 73.2 years.

In 2009, primary energy production in the world was equal to 10869 million tons of crude oil. In the same year, total energy consumption in the world was 9988 million tons of crude oil.

According to statistics issued by OPEC, Iran crude oil production in 2012 was 3740 thousand barrels per day. Iran ranks the second among the 12 OPEC oil producing countries. Saudi Arabia with 9763 thousand barrels is ranked the first among the world's oil producing countries.

According to the cited statistics, Iran ranks the fifth among the OPEC oil exporting countries. Besides, supplying about 202 billion cubic meters of natural gas to the market, Iran is the largest gas supplier in OPEC.

In 2010, Iran GDP per capita was 5227 US dollars, whereas Norway with a GDP per capita of 84589 dollars holds the highest GDP per capita.

From the year 1358 to the year 1392, there were eleven presidential election rounds in the Islamic Republic of Iran. The percentage of public participation in the eleventh presidential election was about 77 percent. The rate of public participation in the ninth round of the Islamic Consultative Assembly election reached 64 percent, showing a 9 percent increase compared to the previous election.
